MY PROFIL

Actually I'm

Currently a student at Epitech, I am learning web development back and front, and I want to find a work-study program in a nice company.

Little word for my school Epitech

I love this school because the pedagogy is done by project, and then my code has a meaning and I really learn

Before I

I had a lot of odd job, but now I want to become a developer and be an expert in my field, while always learning new things
